THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CV

January-December 2001

Subject Index

AERODYNAMICS

A data exchange method for fluid-structure interaction problems. G.S.L. Goura, K.J. Badcock, M.A. Woodgate and B.E. Richards, pp 215-221.

Aeroservoelastic simulation by time-marching. L. Djayapertapa and C.B. Allen, pp 667-678.

An assessment of the 2D vortex method in aircraft wake simulation. W.R. Graham, pp 653-666.

An eddy-viscosity limited algebraic stress model for shock–boundary-layer interaction. N. Qin and G. Richardson, pp 105-118.

A neural network approach to the calibration of a flush air data system. W.J. Crowther and P.J. Lamont, pp 85-95.

An experimental and numerical study of synthetic jet flow. G. Hong, S.G. Mallinson and J.A. Reizes, pp 41-49.

A new moving-boundary algorithm with application to SRM internal ballistics. S.M.H. Karimian and A. Amoli, pp 697-705.

A numerical study of the application of vane and air-jet vortex generators. C. Küpper and F.S. Henry, pp 255-265.

Assessment of turbulence model performance for transonic flow over an axisymmetric bump. R.G.M. Hasan and J.J. McGuirk, pp 17-31.

A strategic European approach to aerodynamics research, technology and development. P.C. Dexter, pp 451-457.

Development and application of farfield drag extraction techniques for complex viscous flows. D.L. Hunt, pp 161-169.

Experimental and numerical investigation of wind tunnel wall interference near Mach one. M. Mokry, M. Khalid, Y. Mébarki and A. Rebaine, pp 589-596.

Experimental investigation into transonic flows over tandem cavities. D. Bray, K. Knowles and N. Taborda, pp 119-124.

Experimental study on the flow and noise characteristics of under-expanded notched slot jets. S.B. Verma and E. Rathakrishnan, pp 267-275.

Extensions to Maskell's theory for blockage effects on bluff bodies in a closed wind tunnel. J.E. Hackett and K.R. Cooper, pp 409-418.

Flow regimes associated with yawed rectangular cavities. M. Czech, T. Maurides, E. Savory and N. Toy, pp 125-134.

Future challenges for powerplant aerodynamic integration in combat aircraft. M.G. Philpot, pp 335-342.

Helicopter encounters with aircraft vortex wakes. G.D. Padfield and G.P. Turner, pp 1-8.

Implicit method for the time marching analysis of flutter. G.S.L. Goura, K.J. Badcock, M.A. Woodgate and B.E. Richards, pp 199-214.

Multigrid acceleration of an upwind Euler method for hovering rotor flows. C.B. Allen, pp 517-524.

Multigrid upwind Euler/Navier-Stokes computation on adaptive unstructured meshes. Y. Zheng and L. He, pp 173-184.

Non-inertial multiblock Navier-Stokes calculation for hovering rotor flowfields using relative velocity approach. B. Zhong and N. Qin, pp 379-389.

Numerical and experimental investigations of air-jet vortex generators in streamwise pressure gradients. N.P. Lewington, F.S. Henry, D.J. Peake and C. Singh, pp 401-407.

Performance enhancement evaluation of an actuated trailing edge flap. W. Chan and A. Brocklehurst, pp 391-399.

Potential fuel savings due to hybrid laminar flow control under operational conditions. T.M. Young and J.P. Fielding, pp 581-588.

QUACC, a novel method for predicting unsteady flows — including propellers and store release. D.L. Hunt, M. Childs and M. Maina, pp 427-434.

Reynolds-stress modelling of afterbody flows. M.A. Leschziner, P. Batten and T.J. Craft, pp 297-306.

Simulation of flows within an electrostatic ion thruster for space missions. M. Jugroot and J.K. Harvey, pp 613-618.

The effect of wing planform shape on dynamic stall. F.N. Coton, R.A.McD. Galbraith and R.B. Green, pp 151-159.

Transition and separation control in the leading edge region. P.W.C. Wong, M. Maina and A.M. Cobbin, pp 371-378.

Trimmed deep stall on the F-16 Fighting Falcon. L.D. Evangelou, A.W. Self, J.E. Allen and S. Lo, pp 679-683.

Understanding subsonic and transonic cavity flows. K.J. Badcock, B.E. Edwards and J. Henderson, pp 77-84.

Visualisation of flow separation with shear-sensitive liquid crystals. S. O'Brien and S. Zhong, pp 597-602.

Wing aerodynamics and the science of compromise. J. Jupp, pp 633-641.

COMMERCIAL AVIATION
On (civil) aviation future(s). D.M. Bushnell, pp 603-606.

COMPUTATIONAL FLUID DYNAMICS
Embedded direct numerical simulation for aeronautical CFD. N.D. Sandham, M. Alam and S. Morin, pp 193-198.

DEFENCE
Impacts of aero-engine deteriorations on military aircraft mission's effectiveness. M. Naeem, R. Singh and D. Probert, pp 685-695.

DYNAMICS
An investigation of Handley Page Jetstream handling during landing. G.J. Mullen, pp 307-314.
Fuzzy modelling for aircraft dynamics identification. G. Mengali, pp 551-555.
The design of fly-by-wire flight control systems. C. Fielding, pp 543-549.

DESIGN
The application of Pareto methods to multidisciplinary design optimisation. J.C. Harris and S.V. Fenwick, pp 329-334.

ERRATA
Errata: A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment. C.I.V. Kerr and P.C. Ivey, p 343.
Errata: Inflight icing data gathering during routine flight operations — a case study. A.P. Brown, p 642.
Errata: Planning for super safety: the fail-safe dimension. R.W. Howard, p 286.

FLIGHT TESTING
Errata: Inflight icing data gathering during routine flight operations — a case study. A.P. Brown, p 642.
Inflight icing data gathering during routine flight operations — a case study. A.P. Brown, pp 501-516.
Integrated air data sensors. M.A. Menzies, pp 223-229.

INTERNAL BALLISTICS
A new moving-boundary algorithm with application to SRM internal ballistics. S.M.H. Karimian and A. Amoli, pp 697-705.

KITES
Kite equilibrium and bridle length. K. Alexander and J. Stevenson, pp 535-541.

MISSILES
Air-to-ground weapon aiming — a synopsis and a look to the future. K.L. Edwards, S.J. Lloyd and J.F. Ralph, pp 53-62.
Hypersonic missiles — some problem areas. R.A. East and J.A. Edwards, pp 643-651.

NOISE
Active control of fan noise from high-bypass ratio aeroengines: a numerical study. P. Traub, F. Kennepohl and K. Heinig, pp 627-631.
Effect of Mach number on the acoustic field of 2:1 elliptic-slot jet. E. Rathakrishnan and S.B. Verma, pp 9-16.
Experimental study on the flow and noise characteristics of under-expanded notched slot jets. S.B. Verma and E. Rathakrishnan, pp 267-275.

PROPULSION
Active control of fan noise from high-bypass ratio aeroengines: a numerical study. P. Traub, F. Kennepohl and K. Heinig, pp 627-631.
A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment. C.I.V. Kerr and P.C. Ivey, pp 287-293.
Errata: A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment. C.I.V. Kerr and P.C. Ivey, p 343.
Future challenges for powerplant aerodynamic integration in combat aircraft. M.G. Philpot, pp 335-342.
Impacts of aero-engine deteriorations on military aircraft mission's effectiveness. M. Naeem, R. Singh and D. Probert, pp 685-695.
Life extending controller design for reusable rocket engines. A. Ray, M.S. Holmes and C.F. Lorenzo, pp 315-322.
Optimisation of aero gas turbine engines. A. Guha, pp 345-358.
Performance parameter benchmarks for small piston aero-engines. B.J Brinkworth, pp 63-68.
Saving costs in design, manufacturing and operation of aero engine parts. J. Broede, pp 619-626.
Simulation of flows within an electrostatic ion thruster for space missions. M. Jugroot and J.K. Harvey, pp 613-618.

RESEARCH MANAGEMENT
A strategic European approach to aerodynamics research, technology and development. P.C. Dexter, pp 451-457.

ROTORCRAFT
Helicopter encounters with aircraft vortex wakes. G.D. Padfield and G.P. Turner, pp 1-8.
Laplace-domain approximation to the transfer functions of a rotor blade in forward flight. F. Nitzsche, pp 233-240.
Multigrid acceleration of an upwind Euler method for hovering rotor flows. C.B. Allen, pp 517-524.
Non-inertial multiblock Navier-Stokes calculation for hovering rotor flowfields using relative velocity approach. B. Zhong and N. Qin, pp 379-389.
Performance enhancement evaluation of an actuated trailing edge flap. W. Chan and A. Brocklehurst, pp 391-399.
Trajectory tracking for a helicopter model. G. Avanzini, pp 69-76.

RUNWAY DEBRIS
Characterisation of the realistic impact threat from runway debris. E.S. Greenhalgh, G.A.F. Chichester, A. Mew, M. Slade and R. Bowen, pp 557-570.

SAFETY
Errata: Planning for super safety: the fail-safe dimension. R.W. Howard, p 286.
Simulating the evacuation of a commercial airliner. C.R. Robbins and S. McKee, pp 323-328.

SIMULATION
Aeroservoelastic simulation by time-marching. L. Djayapertapa and C.B. Allen, pp 667-678.
Simulating the evacuation of a commercial airliner. C.R. Robbins and S. McKee, pp 323-328.
Simulation of flows within an electrostatic ion thruster for space missions. M. Jugroot and J.K. Harvey, pp 613-618.

SYSTEMS
Air-to-ground weapon aiming — a synopsis and a look to the future. K.L. Edwards, S.J. Lloyd and J.F. Ralph, pp 53-62.
An all weather millimetre wave imaging radar for UAVs. A. Britton and D. Joynson, pp 609-612.
A neural network approach to the calibration of a flush air data system. W.J. Crowther and P.J. Lamont, pp 85-95.
Applications of multirate optical fibre code-division-multiplexing systems to high-speed data communications for air traffic control. A.B. Sharma and J-G. Jian-Guo Zhang, pp 33-39.
A technique for predicting pilot model parameters using inverse simulation. G.R. Leacock and D.G. Thomson, pp 97-103.
Avionics extrapolations (A foray into the future of avionics). R. Fitz-Patrick, pp 241-253.
Energy requirements for the flight of micro air vehicles. J.F. Henderson, G.D. Lock and M.I. Woods, pp 135-149.

Integrated air data sensors. M.A. Menzies, pp 223-229.
Integrated sensor/actuator FDI and reconfigurable control for fault-tolerant flight control system design. Ch.M. Hajiyev and F. Caliskan, pp 525-533.
Life extending controller design for reusable rocket engines. A. Ray, M.S. Holmes and C.F. Lorenzo, pp 315-322.
Numerical and experimental investigations on the reduction of wind tunnel wall interference by means of adaptive slots. O. Meyer, W. Nitsche and I. Futterer, pp 571-580.
Numerical studies of infrared signature levels of complete aircraft. S.P. Mahilikar, S.K. Sane, U.N. Gaitonde and A.G. Marathe, pp 185-192.
The application of self-organising fuzzy control to station-keeping in unmanned air vehicles. J.T. Platts and W. Forsythe, pp 359-370.
The design of fly-by-wire flight control systems. C. Fielding, pp 543-549.
Theoretical and experimental investigations on an active control system for vertical fin buffeting alleviation using strain actuation. F. Nitzsche, S. Liberatore and D.G. Zimcik, pp 277-285.
Trajectory tracking for a helicopter model. G. Avanzini, pp 69-76.

TESTING FACILITIES AND TECHNIQUES

Constant temperature hot-wire measurements in a short duration supersonic wind tunnel. J. Weiss, H. Knauss, S. Wagner and A.D. Kosinov, pp 435-441.
Experimental and numerical investigation of wind tunnel wall interference near Mach one. M. Mokry, M. Khalid, Y. Mébarki and A. Rebaine, pp 589-596.
Extensions to Maskell's theory for blockage effects on bluff bodies in a closed wind tunnel. J.E. Hackett and K.R. Cooper, pp 409-418.
Numerical and experimental investigations on the reduction of wind tunnel wall interference by means of adaptive slots. O. Meyer, W. Nitsche and I. Futterer, pp 571-580.
The accuracy of internal wind tunnel balances for wind tunnel force measurements, the problem of definition and verification. B. Ewald, pp 443-449.

UNMANNED AIR VEHICLES (UAVs)

An all weather millimetre wave imaging radar for UAVs. A. Britton and D. Joynson, pp 609-612.
Energy requirements for the flight of micro air vehicles. J.F. Henderson, G.D. Lock and M.I. Woods, pp 135-149.
The application of self-organising fuzzy control to station-keeping in unmanned air vehicles. J.T. Platts and W. Forsythe, pp 359-370.

Author Index

ALAM, M., MORIN, S. and SANDHAM, N.D.
Embedded direct numerical simulation for aeronautical CFD, pp 193-198.

ALEXANDER, K. and STEVENSON, J.
Kite equilibrium and bridle length, pp 535-541.

ALLEN, C.B.
Multigrid acceleration of an upwind Euler method for hovering rotor flows, pp 517-524.

ALLEN, C.B. and DJAYAPERTAPA, L.
Aeroservoelastic simulation by time-marching, pp 667-678.

ALLEN, J.E., EVANGELOU, L.D., SELF, A.W. and LO, S.
Trimmed deep stall on the F-16 Fighting Falcon, pp 679-683.

AMOLI, A. and KARIMIAN, S.M.H.
A new moving-boundary algorithm with application to SRM internal ballistics, pp 697-705.

AVANZINI, G.
Trajectory tracking for a helicopter model, pp 69-76.

BADCOCK, K.J., RICHARDS, B.E. and HENDERSON, J.
Understanding subsonic and transonic cavity flows, pp 77-84.

BADCOCK, K.J., WOODGATE, M.A., RICHARDS, B.E. and GOURA, G.S.L.
Implicit method for the time marching analysis of flutter, pp 199-214.
A data exchange method for fluid-structure interaction problems, pp 215-221.

BARAKOS, G., VAHDATI, M., SAYMA, A.I., BRÉARD, C. and IMREGUN, M.
A fully distributed unstructured Navier-Stokes solver for large-scale aeroelasticity computations, pp 419-426.

BATTEN, P., CRAFT, T.J. and LESCHZINER, M.A.
Reynolds-stress modelling of afterbody flows, pp 297-306.

BOWEN, R., GREENHALGH, E.S., CHICHESTER, G.A.F., MEW, A. and SLADE, M.
Characterisation of the realistic impact threat from runway debris, pp 557-570.

BRAY, D., KNOWLES, K. and TABORDA, N.
Experimental investigation into transonic flows over tandem cavities, pp 119-124.

BRÉARD, C., BARAKOS, G., VAHDATI, M., SAYMA, A.I. and IMREGUN, M.
A fully distributed unstructured Navier-Stokes solver for large-scale aeroelasticity computations, pp 419-426.

BRINKWORTH, B.J.
Performance parameter benchmarks for small piston aero-engines, pp 63-68.

BRITTON, A. and JOYNSON, D.
An all weather millimetre wave imaging radar for UAVs, pp 609-612.

BROCKLEHURST, A. and CHAN, W.
Performance enhancement evaluation of an actuated trailing edge flap, pp 391-399.

BROEDE, J.
Saving costs in design, manufacturing and operation of aero engine parts, pp 619-626.

BROWN, A.P.
Inflight icing data gathering during routine flight operations — a case study, pp 501-516.
Errata: Inflight icing data gathering during routine flight operations — a case study, p 642.

On (civil) aviation future(s), pp 603-606.

CALISKAN, F. and HAJIYEV, CH.M.
Integrated sensor/actuator FDI and reconfigurable control for fault-tolerant flight control system design, pp 525-533.

CHAN, W. and BROCKLEHURST, A.
Performance enhancement evaluation of an actuated trailing edge flap, pp 391-399.

CHICHESTER, G.A.F., GREENHALGH, E.S., MEW, A., SLADE, M. and BOWEN, R.
Characterisation of the realistic impact threat from runway debris, pp 557-570.

CHILDS, M., HUNT, D.L. and MAINA, M.
QUACC, a novel method for predicting unsteady flows — including propellers and store release, pp 427-434.

COBBIN, A.M., WONG, P.W.C. and MAINA, M.
Transition and separation control in the leading edge region, pp 371-378.

COOPER, K.R. and HACKETT, J.E.
Extensions to Maskell's theory for blockage effects on bluff bodies in a closed wind tunnel, pp 409-418.

COTON, F.N., GALBRAITH, R.A.McD. and GREEN, R.B.
The effect of wing planform shape on dynamic stall, pp 151-159.

CRAFT, T.J., LESCHZINER, M.A. and BATTEN, P.
Reynolds-stress modelling of afterbody flows, pp 297-306.

CROWTHER, W.J. and LAMONT, P.J.
A neural network approach to the calibration of a flush air data system, pp 85-95.

CZECH, M., MAURIDES, T., SAVORY, E. and TOY, N.
Flow regimes associated with yawed rectangular cavities, pp 125-134.

DEXTER, P.C.
A strategic European approach to aerodynamics research, technology and development, pp 451-457.

DJAYAPERTAPA, L. and ALLEN, C.B.
Aeroservoelastic simulation by time-marching, pp 667-678.

EAST, R.A. and EDWARDS, J.A.
Hypersonic missiles — some problem areas, pp 643-651.

EDWARDS, J.A. and EAST, R.A.
Hypersonic missiles — some problem areas, pp 643-651.

EDWARDS, K.L. LLOYD, S.J. and RALPH, J.F.
Air-to-ground weapon aiming — a synopsis and a look to the future, pp 53-62.

EVANGELOU, L.D., ALLEN, J.E., SELF, A.W. and LO, S.
Trimmed deep stall on the F-16 Fighting Falcon, pp 679-683.

EWALD, B.
The accuracy of internal wind tunnel balances for wind tunnel force measurements, the problem of definition and verification, pp 443-449.

FENWICK, S.V. and HARRIS, J.C.
The application of Pareto methods to multidisciplinary design optimisation, pp 329-334.

FIELDING, C.
The design of fly-by-wire flight control systems, pp 543-549.

FIELDING, J.P. and YOUNG, T.M.
Potential fuel savings due to hybrid laminar flow control under operational conditions, pp 581-588.

FITZPATRICK, R.
Avionics extrapolations (A foray into the future of avionics), pp 241-253.

FORSYTHE, W. and PLATTS, J.T.
The application of self-organising fuzzy control to station-keeping in unmanned air vehicles, pp 359-370.

FUTTERER, I., MEYER, O. and NITSCHE, W.
Numerical and experimental investigations on the reduction of wind tunnel wall interference by means of adaptive slots, pp 571-580.

GAITONDE, U.N., MARATHE, A.G., MAHILIKAR, S.P. and SANE, S.K.
Numerical studies of infrared signature levels of complete aircraft, pp 185-192.

GALBRAITH, R.A.McD., GREEN, R.B. and COTON, F.N.
The effect of wing planform shape on dynamic stall, pp 151-159.

GOURA, G.S.L., BADCOCK, K.J., WOODGATE, M.A. and RICHARDS, B.E.
Implicit method for the time marching analysis of flutter, pp 199-214.
A data exchange method for fluid-structure interaction problems, pp 215-221.

GRAHAM, W.R.
An assessment of the 2D vortex method in aircraft wake simulation, pp 653-666.

GREEN, R.B., COTON, F.N. and GALBRAITH, R.A.McD.
The effect of wing planform shape on dynamic stall, pp 151-159.

GREENHALGH, E.S., CHICHESTER, G.A.F., MEW, A., SLADE, M. and BOWEN, R.
Characterisation of the realistic impact threat from runway debris, pp 557-570.

GUHA, A.
Optimisation of aero gas turbine engines, pp 345-358.

HACKETT, J.E. and COOPER, K.R.
Extensions to Maskell's theory for blockage effects on bluff bodies in a closed wind tunnel, pp 409-418.

HAJIYEV, CH.M. and CALISKAN, F.
Integrated sensor/actuator FDI and reconfigurable control for fault-tolerant flight control system design, pp 525-533.

HARRIS, J.C. and FENWICK, S.V.
The application of Pareto methods to multidisciplinary design optimisation, pp 329-334.

HARVEY, J.K. and JUGROOT, M.
Simulation of flows within an electrostatic ion thruster for space missions, pp 613-618.

HASAN, R.G.M. and McGUIRK, J.J.
Assessment of turbulence model performance for transonic flow over an axisymmetric bump, pp 17-31.

HE, L. and ZHENG, Y.
Multigrid upwind Euler/Navier-Stokes computation on adaptive unstructured meshes, pp 173-184.

HEINIG, K., TRAUB, P. and KENNEPOHL, F.
Active control of fan noise from high-bypass ratio aeroengines: a numerical study, pp 627-631.

HENDERSON, J., BADCOCK, K.J. and RICHARDS, B.E.
Understanding subsonic and transonic cavity flows, pp 77-84.

HENDERSON, J.F., LOCK, G.D. and WOODS, M.I.
Energy requirements for the flight of micro air vehicles, pp 135-149.

HENRY, F.S. and KÜPPER, C.
A numerical study of the application of vane and air-jet vortex generators, pp 255-265.

HENRY, F.S., LEWINGTON, N.P., PEAKE, D.J. and SINGH, C.
Numerical and experimental investigations of air-jet vortex generators in streamwise pressure gradients, pp 401-407.

HOLMES, M.S., LORENZO, C.F. and RAY, A.
Life extending controller design for reusable rocket engines, pp 315-322.

HONG, G., MALLINSON, S.G. and REIZES, J.A.
An experimental and numerical study of synthetic jet flow, pp 41-49.

HOWARD, R.W.
Errata: Planning for super safety: the fail-safe dimension, p 286.

HUNT, D.L.
Development and application of farfield drag extraction techniques for complex viscous flows, pp 161-169.

HUNT, D.L., CHILDS, M. and MAINA, M.
QUACC, a novel method for predicting unsteady flows — including propellers and store release, pp 427-434.

IMREGUN, M., BRÉARD, C., BARAKOS, G., VAHDATI, M., and SAYMA, A.I.
A fully distributed unstructured Navier-Stokes solver for large-scale aeroelasticity computations, pp 419-426.

IVEY, P.C. and KERR, C.I.V.
A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment, pp 287-293.
Errata: A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment, p 343.

JOYNSON, D. and BRITTON, A.
An all weather millimetre wave imaging radar for UAVs, pp 609-612.

JUGROOT, M. and HARVEY, J.K.
Simulation of flows within an electrostatic ion thruster for space missions, pp 613-618.

JUPP, J.
Wing aerodynamics and the science of compromise, pp 633-641.

KARIMIAN, S.M.H. and AMOLI, A.
A new moving-boundary algorithm with application to SRM internal ballistics, pp 697-705.

KENNEPOHL, F., TRAUB, P. and HEINIG, K.
Active control of fan noise from high-bypass ratio aeroengines: a numerical study, pp 627-631.

KERR, C.I.V. and IVEY, P.C.
A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment, pp 287-293.
Errata: A strategic review of the large civil aeroengine market and the paradigm shift to a service-oriented environment, p 343.

KHALID, M., MOKRY, M., MÉBARKI, Y. and REBAINE, A.
Experimental and numerical investigation of wind tunnel wall interference near Mach one, pp 589-596.

KNAUSS, H., WEISS, J., WAGNER, S. and KOSINOV, A.D.
Constant temperature hot-wire measurements in a short duration supersonic wind tunnel, pp 435-441.

KNOWLES, K., TABORDA, N. and BRAY, D.
Experimental investigation into transonic flows over tandem cavities, pp 119-124.

KOSINOV, A.D., KNAUSS, H., WEISS, J. and WAGNER, S.
Constant temperature hot-wire measurements in a short duration supersonic wind tunnel, pp 435-441.

KÜPPER, C. and HENRY, F.S.
A numerical study of the application of vane and air-jet vortex generators, pp 255-265.

LAMONT, P.J. and CROWTHER, W.J.
A neural network approach to the calibration of a flush air data system, pp 85-95.

LEACOCK, G.R. and THOMSON, D.G.
A technique for predicting pilot model parameters using inverse simulation, pp 97-103.

LESCHZINER, M.A., BATTEN, P. and CRAFT, T.J.
Reynolds-stress modelling of afterbody flows, pp 297-306.

LEWINGTON, N.P., HENRY, F.S., PEAKE, D.J. and SINGH, C.
Numerical and experimental investigations of air-jet vortex generators in streamwise pressure gradients, pp 401-407.

LIBERATORE, S., ZIMCIK, D.G. and NITZSCHE, F.
Theoretical and experimental investigations on an active control system for vertical fin buffeting alleviation using strain actuation, pp 277-285.

LLOYD, S.J., RALPH, J.F. and EDWARDS, K.L.
Air-to-ground weapon aiming — a synopsis and a look to the future, pp 53-62.

LO, S., ALLEN, J.E., EVANGELOU, L.D. and SELF, A.W.
Trimmed deep stall on the F-16 Fighting Falcon, pp 679-683.

LOCK, G.D., WOODS, M.I. and HENDERSON, J.F.
Energy requirements for the flight of micro air vehicles, pp 135-149.

LORENZO, C.F., RAY, A. and HOLMES, M.S.
Life extending controller design for reusable rocket engines, pp 315-322.

McGUIRK, J.J. and HASAN, R.G.M.
Assessment of turbulence model performance for transonic flow over an axisymmetric bump, pp 17-31.

McKEE, S. and ROBBINS, C.R.
Simulating the evacuation of a commercial airliner, pp 323-328.

MAHILIKAR, S.P., SANE, S.K., GAITONDE, U.N. and MARATHE, A.G.
Numerical studies of infrared signature levels of complete aircraft, pp 185-192.

MAINA, M., CHILDS, M. and HUNT, D.L.
QUACC, a novel method for predicting unsteady flows — including propellers and store release, pp 427-434.

MAINA, M., COBBIN, A.M. and WONG, P.W.C.
Transition and separation control in the leading edge region, pp 371-378.

MALLINSON, S.G., REIZES, J.A. and HONG, G.
An experimental and numerical study of synthetic jet flow, pp 41-49.

MARATHE, A.G., MAHILIKAR, S.P., SANE, S.K. and GAITONDE, U.N.
Numerical studies of infrared signature levels of complete aircraft, pp 185-192.

MAURIDES, T., SAVORY, E., TOY, N. and CZECH, M.
Flow regimes associated with yawed rectangular cavities, pp 125-134.
